OBJECTIVE

Aspiring Full Stack Developer with a solid grounding in front-end development and a growing foundation in Python for the back end. Skilled at building responsive, user-friendly interfaces with React, JavaScript, HTML, and CSS, and comfortable working with SQL databases. Currently deepening my Python skills to round out my full-stack capabilities. Keen to step into my first professional role, gain real-world experience, and contribute to clean, reliable web applications while continuing to learn and grow with the team.

SKILLS

Languages: Python, JavaScript, SQL

Frontend: HTML, CSS, Bootstrap, JavaScript, React

Backend: Python, Django

Database: MySQL, Relational database design

Tools & Version Control: Git, GitHub, VS Code

Concepts: CRUD operations, REST APIs, Authentication, MVC

EXPERIENCE

I am a fresher, actively seeking my first Full Stack Developer role - open to internships and entry-level positions where I can apply my training and keep learning on the job.

PROJECTS

E-Commerce Shopping Website

Python · Django · MySQL

- Built a full-stack e-commerce web application with complete CRUD operations for products, users, and orders.
- Implemented user authentication, a shopping cart, product management, and an order-processing workflow.
- Used the Django ORM for efficient, maintainable database interaction with MySQL.
- Delivered a fully functional prototype covering the complete purchase flow, from browsing products to placing an order.
